**EVERGREEN ENGINEERING MOVES TO TECHNOLOGY CENTER IN HILLSBORO**

**(HILLSBORO, OR) August 11, 2006** – Evergreen Engineering announced that it is relocating its Hillsboro office to a larger building in the Technology Center located at the northwest corner of Evergreen Parkway and Cornelius Pass Road in Hillsboro by the end of August 2006. Evergreen currently resides in a 5,000 sq ft office space; the new space, with an additional 3,000 sq ft, will enable Evergreen to accommodate its growing staff. It will also provide an in-house venue to conduct client-oriented training sessions and seminars.

The firm currently employs over 90 full-time workers, comprised of principals, professional engineers, construction managers, designers, drafters, and administrative personnel; 85% hold college degrees, 10% hold advanced degrees. The firm's growth pattern continues to be steady, and anticipates its nationwide employee base to reach over 100 by the end of year 2007.

"We are excited with our upcoming move," stated Todd Alsdorf, one of seven Principals of Evergreen Engineering. "We have experienced tremendous growth over the past few years. We listen to our employees' needs, and our ability to retain employees since our inception is a strong indication of that capacity."

Established in 1985, Evergreen Engineering is an engineering consulting firm serving various industries such as bioscience, clean manufacturing, forest products, industrial manufacturing, light industrial, metals, microelectronics, and semiconductor. Evergreen has a reputation of listening to clients' objectives and being able to do projects other firms consider too difficult or impossible. Evergreen has offices in Eugene, OR; Hillsboro, OR; Atlanta, GA; and Santa Clara, CA with clients throughout the United States and Canada.
