

Evergreen is a full service consulting engineering company, with all engineering disciplines, serving the wood products industry since 1985. Evergreen has extensive experience with structural, engineered, and composite wood plants, ranging from numerous custom retrofit projects to complete greenfield plants. We have a highly qualified technical staff, including some of the leading experts in the industry, with hands-on operational experience in Engineered Wood Products and panel plants as well as innovative process expertise.

We have in-house experience with OSB from the early 1980's, and continue to support this industry. Half of our current 460 years of combined engineering and operations experience has been with wood panel plants. Evergreen and its employees have worked for five of the top OSB producing companies. We can supply consulting engineering for every step of the OSB process throughout the plant. Evergreen is the most qualified and experienced engineering company with log handling, conditioning, and environmental systems for panel plants.

Evergreen offers the best possible range of knowledge and capabilities to address retrofit, expansion, and new construction for OSB projects.

We welcome your questions, and would be pleased to help with improvements and/or expansions to your facility.
