

EVERGREEN ENGINEERING

Engineering and Construction Services

Our Company

Evergreen Engineering is a leading A/E/C firm focusing on the solar, semiconductor and pharmaceutical industries. Design and construction excellence, efficient delivery, and marketing savvy have led to our unprecedented growth and leadership position. We are looking for strong candidates who share our vision and passion.

Established in 1985, we have offices in Hillsboro, OR; Eugene, OR; Santa Clara, CA; and Albany, NY. The position described here is for our **Hillsboro location**. To learn more about us, please visit www.EvergreenEngineering.com.

Position Available

Evergreen Engineering is currently seeking a **full-time I&C/System Integrator**, who will interface directly with our Project Managers and provide design services for our rapidly growing list of clients. The successful candidate will be highly organized, confident, able to effectively communicate both verbally and in writing, an effective team player, and will have a strong interest in Engineering.

Minimum Qualifications:

Education:

Bachelor's Degree in Chemical or Electrical Engineering, or related field (Engineer position).
High school graduate or equivalent or some college (Designer position).

Experience & Skills:

- Intermediate to excellent computer skills with MS Windows XP, Outlook, Word, and Excel.
- Proficient with AutoCAD
- Effective communication and impromptu problem solving skills
- Ability to follow through in a self-motivated fashion
- Ability to work in a cost-effective, customer-focused, team-based environment
- Understanding and skill in assessing a customer's requirements/needs in the field
- 5-10 years design experience in Instrument Controls
- Mechanical or Chemical Knowledge is a plus

Job Description:

- Determine, select, and specify instrumentation and controls required to monitor, operate and control mechanical, process, and electrical systems
- Provide input on / develop P&ID's
- Produce logic diagrams, control narratives (sequence of operations) and wiring diagrams.
- Produce equipment commissioning documents
- Interpret and apply codes, job procedures, standards, and specifications
- Interface with other design disciplines

- Provide field assistance as required
- Monitor and review on-site installation, start-up and operation of instrumentation and controls
- Perform inspections of equipment as required
- Specify and evaluate network systems
- Travel, as required, to ensure the successful execution of project and/or department goals

Must be authorized to work in the United States on a full-time basis for any employer.

Evergreen Engineering is a drug-free work place. All offers of employment are contingent upon successfully passing a drug screen with negative results, as well as clear background check results.

Only qualified candidates will be contacted. No phone calls or inquiries, please.

If you are interested in applying for this position, and you meet the requirements, please submit your resume and cover letter including salary requirements to: spuri@eepdx.com or fax to: 503.439.8767
